

# Online Safety Computing

Spring 1 2023

Class Lynher

In this lesson we learnt about spam and what to do about it.

Spam is usually a fake scam. It sends you things you don't want.

Next we learnt about the importance of citing an internet webpage to give the owner credit and not to plagiarise.

## Plagiarism

The Internet is a wonderful tool that allows people all over the world to share information and ideas. We can use the Internet to quickly answer questions or learn something new.

However, the same technology that allows this to happen also means that it can be easier than ever to copy something that someone else has worked on.

How would you feel if someone copied your work and said it was theirs? Talk to your partner.

## Bibliographies

To create a citation for a webpage, we write...

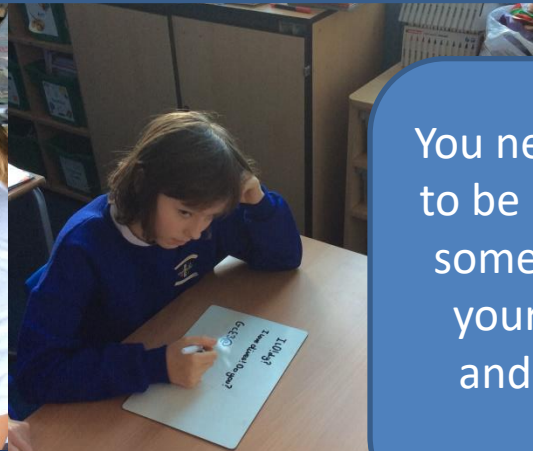

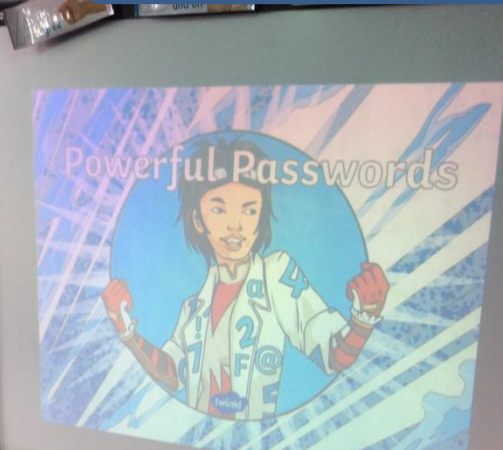

1. The name of the writer or company
2. The year it was written, if you can find it (in brackets)
3. The title of the article or page
4. The word [online] in square brackets
5. How to get to it - Available at  
www.abcdefg.com  
Here is how we cite a webpage:
6. When you read it [Accessed 19 May 2018]  
in square brackets

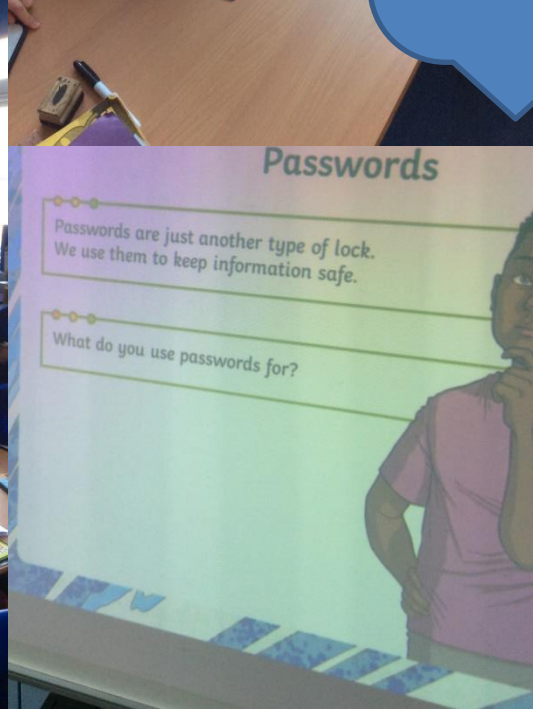

National Geographic (2006). *Plains Zebra* [online] Available at:  
<https://www.nationalgeographic.com/animals/mammals/p/plains-zebra/>  
[Accessed 19 May 2018].

Citing a website is quite complicated but gives credit to the person who came up with the idea.

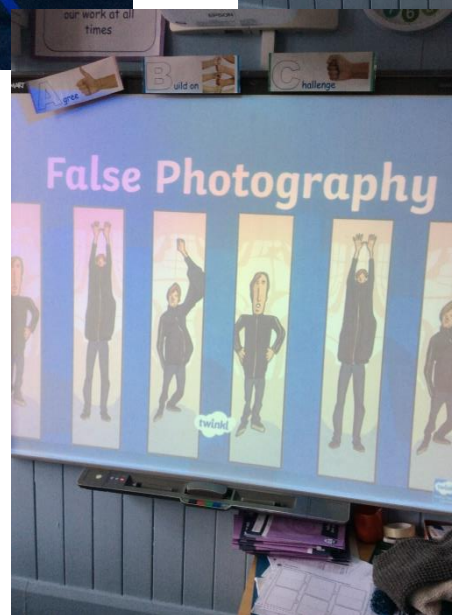

Then we learnt about the importance of having a strong password and some ways of remembering complicated ones.

You need a password to be quite strong as someone could get your bank details and buy loads of things.

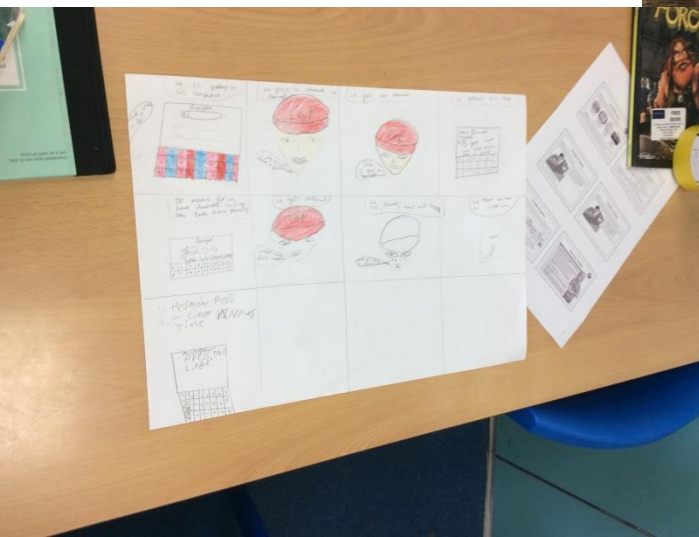

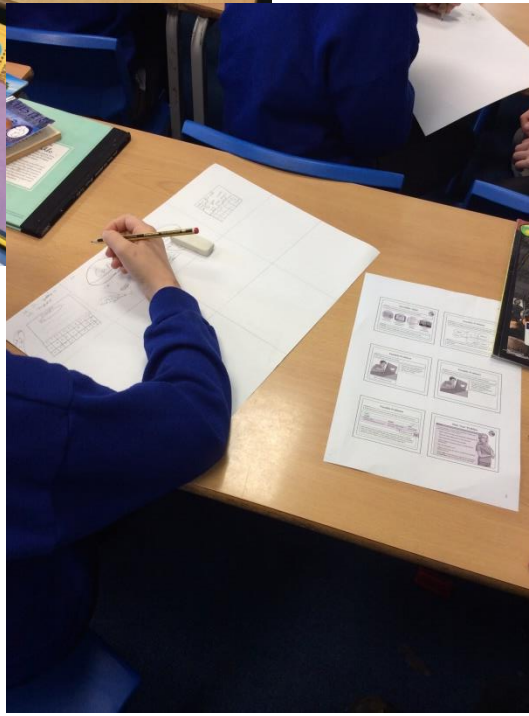

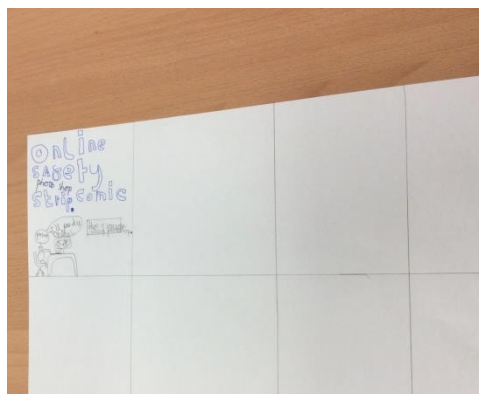

In this lesson we learnt how photographs can be digitally altered and not to always trust what we see.

It was interesting how different something could look just by changing a few things and taking details out.

In our final lesson we chose one of the previous lessons as a focus to make a comic strip of a scenario and how to stay safe.

We did a scenario about a girl changing her photo but realising it was better to go with the one that was her.

Personal Development:  
Children are prepared for a  
technologically enriched world  
The jobs it can be used in are:  
Police

**What I have learnt before:**  
Cyberbullying  
Information sharing online

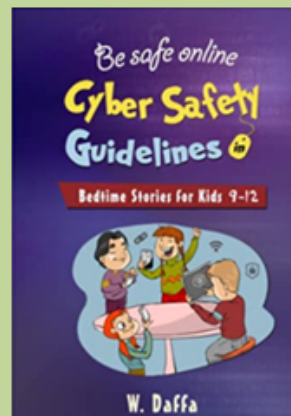

### Forever Facts

I know what spam is and how to spot it  
I know what makes a strong password

### Skills

I know how to distinguish between good  
and bad information found on the internet  
I can use a range of concepts and ideas  
when presenting  
I can use technology safely/ respectfully  
and responsibly  
I can recognise acceptable/ unacceptable  
behaviour

### Exciting Books

### Our Endpoint

What are and how  
can I apply online  
safety rules?

### Subject Specific Vocabulary

spam	a message sent to a large number of people without their consent, usually promoting a product or service
cite	refer to something as evidence
source	where something originates from
alter	to change
phishing	this is an attempt to trick people into visiting malicious websites by sending emails or other messages which pretend to come from banks or online shops
plagiarism	taking someone's work and passing it off as your own
secure	free from danger or risk
photo shop	alter digitally
