

Our Endpoint

To create artwork showing the 4 seasons.

Forever Facts

There are 4 seasons- Spring, Summer, Autumn and Winter.

The northern and southern parts of the world have different seasons at the same time.

Places around the middle of the Earth have 1 long dry season or 2 seasons, dry and rainy.

On Earth, seasons are the result of Earth's orbit around the Sun and Earth's axial tilt.

There are 12 months in a year. January, February, March, April, May, June, July, August, September, October, November, December.

Personal development

Show a sense of enjoyment and fascination in our learning.

Exciting books

Subject Specific Vocabulary

Season	Division of the year based on changes in weather and number of daylight hours.
Weather	The state of the atmosphere at a particular place and time as regards heat, cloudiness, dryness, sunshine, wind, rain, etc.
Hibernate	Animals or plants stay in a dormant state.
Months	The year is split into 12 months
Thermometer	An instrument for measuring and indicating temperature.
Rain gauge	A device for collecting and measuring the amount of rain which falls.
Weather vane	A device, as a rod to which a freely rotating pointer is attached, for indicating the direction of the wind.

What I have learnt before.

To make simple observations.

Skills

Make observations, ask and answer questions.
Identify and classify.
Record in different ways including labelled diagrams.
Begin to use scientific vocabulary.
