## Key Stage Two and Key Stage One End of year data 2016

## Important Note:

Small numbers - In tables 1, 2 and 3 each child is 7.1% and in tables 4 and 5 each child is 9%

We have a case study that clearly demonstrates the impact of one child on our data who made accelerated progress during their time at the school however if their data was not included, we would be in line or above average national attainment in reading, writing and maths.
