Computing

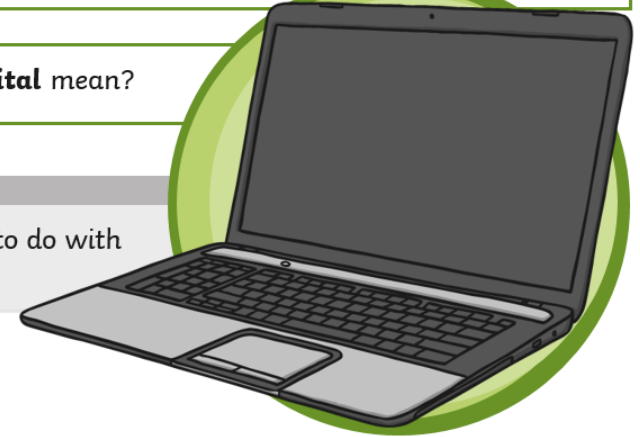

Digital Footprints

When we go online, everything we do leaves a 'footprint' that other people can see, even if it's not something you have posted somewhere publicly.

What does the word **digital** mean?

Digital means anything to do with computer technology.

Personal information tells other people all about you. It's not safe to give it to strangers.

If I don't know I can ask my parents or a teacher.

Your name, where you live and what your school is.

You can find out
the information
you want. .

I can search: weather
Torpoint. I don't need
to write a sentence.

How to Search

Often, searching online will answer lots of questions people may have about a topic.

To get the most useful results when we search, we need to think about the keywords we use.

keywords

'Key' means 'important'.

When we search online, we think about which words are the most important.

Key words are
the ones that
give you
information.

If I'm not sure I can
check with my
grown up.

The news might be scary
or make me sad. It is
better to share this with
a grown up.

These websites would
be fun and safe for
me to use.

www.amazingelephants.com

*A website full of elephant
facts and short video clips.
You can read it easily.*

www.makeanddo.com

*A website full of
instructions and videos
for making crafts
and projects.*

These websites sound
fun or useful but I
would check them
with an adult.

www.newsat9.co.uk

*A website with news stories.
It is quite difficult to
understand.*

www.footiechat.co.uk

*News about football scores.
Anyone can leave comments
about the stories without
them being checked.*

These websites
would make me feel
uncomfortable and I
don't think they are
suitable for children.

www.scaryfilmsfirst.org.uk

*A website about horror
films with trailers and
clips, including films
with age ratings.*

www.chitchat.com

*An open chatroom where
anyone can talk to you. You
can see words on there that
you know you're not allowed
to say.*

In a chatroom they
could be strangers
and that isn't safe.

I didn't like ICT games because there are too many games I could find what I wanted to play.

I can find it on the icon.

Website Review

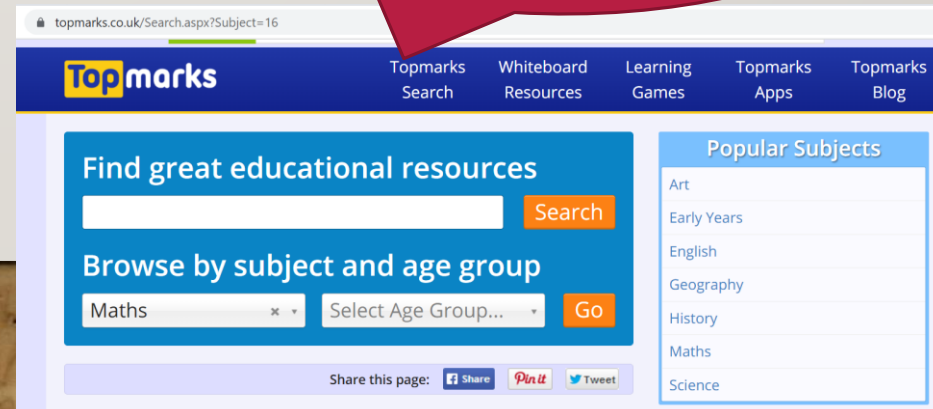

Look at a website with your teacher.

Think about:

- ✓ who the website is for and how you know this;
- ✓ the parts of it you think are most successful;
- ✓ what you think could be improved, if anything;
- ✓ how many stars out of five you would give it.

I prefer ICT games as you it told you how to play the game.

If someone said that to me I would be sad. I should tell my mum. And she can help me

If they send lots to the same person it's called bullying (online).

Being Unkind Online

What would you do if you received this message?

None of us want to be friends with you anymore.

I don't think you should say anything as they might send more horrible messages.

What we already know:

You can use computers to find out information.
 You can play games on line.
 You can use the internet to talk to other people.

To be able to discuss appropriate online behaviours and know what to do when you feel unsafe.

Forever Facts

Some search engines have filters that can make them safe to use.

You can use a search engine to find out information.

Personal information should not be shared with other people.

Personal information includes: your name, where you live/go to school, how old you are.

If I am unsure if feel unsafe always ask a trusted adult to help.

Exciting Books**Culture Capital**

To understand how to safely search online and be able to identify potential dangers.

Subject Specific Vocabulary

Personal information	Knowledge and facts about ourselves e.g. our name and age.
Online search	To use a search engine to find information on a specific subject.
Online safety	Knowing how to safely use the internet and how to keep safe.
Internet	The world's largest computer network, which is made of millions of computers that are linked together. Some parts of the Internet include the World Wide Web, electronic mail, and chat rooms.

Skills

To be able to use a search engine to find out information
To be able to interact safely online.
To be able to discuss why a website might be safe/not safe to use.
To begin to identify what should and should be shared online.
