Summer 1: 2022

Science: Spring to Summer Seasonal change

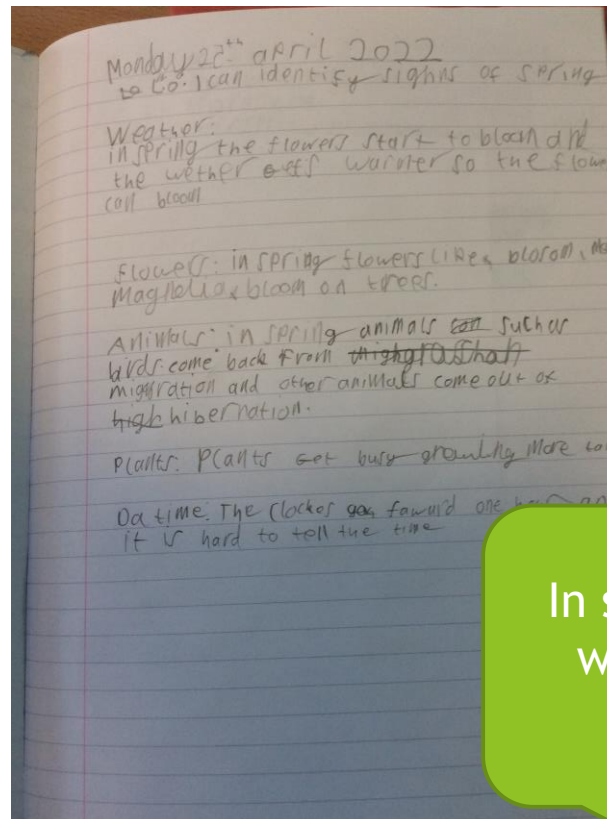

Signs of Spring.

In spring the days are longer than autumn and winter.

In spring the flowers start to bud and the leaves that fell off start to grow back.

In spring the days get warmer as there is more sun.

Signs of Summer

You get the most sun light in the summer so the days are longer.

You can spend more time outside in the summer because there is less rain.

When we have summer Australia has their winter time.

Wednesday 11th May 2022
To L.O. I can identify signs of summer
Sunlight: in summer the daylight gets longer so you only get 8 hours of sleep
~~Daylight~~ You only get 16 hours of daylight

Weather: in summer the sun comes out lots more and we like to go out and play in the sun lots more. In summer we don't get any rain so we can play outside more.

Other countries: When we have summer Australia has winter because they are in the other hemisphere. The North Pole do not have summer, spring and autumn. They do not have summer because the sun doesn't shine on that part of the world and they don't have spring because it is too cold for the plants to grow and that is the same for the things that have autumn.

In the summer most flowers are in full bloom.

Knowing how to keep safe in the summer.

You have to be careful in the sun or you will get sun burn

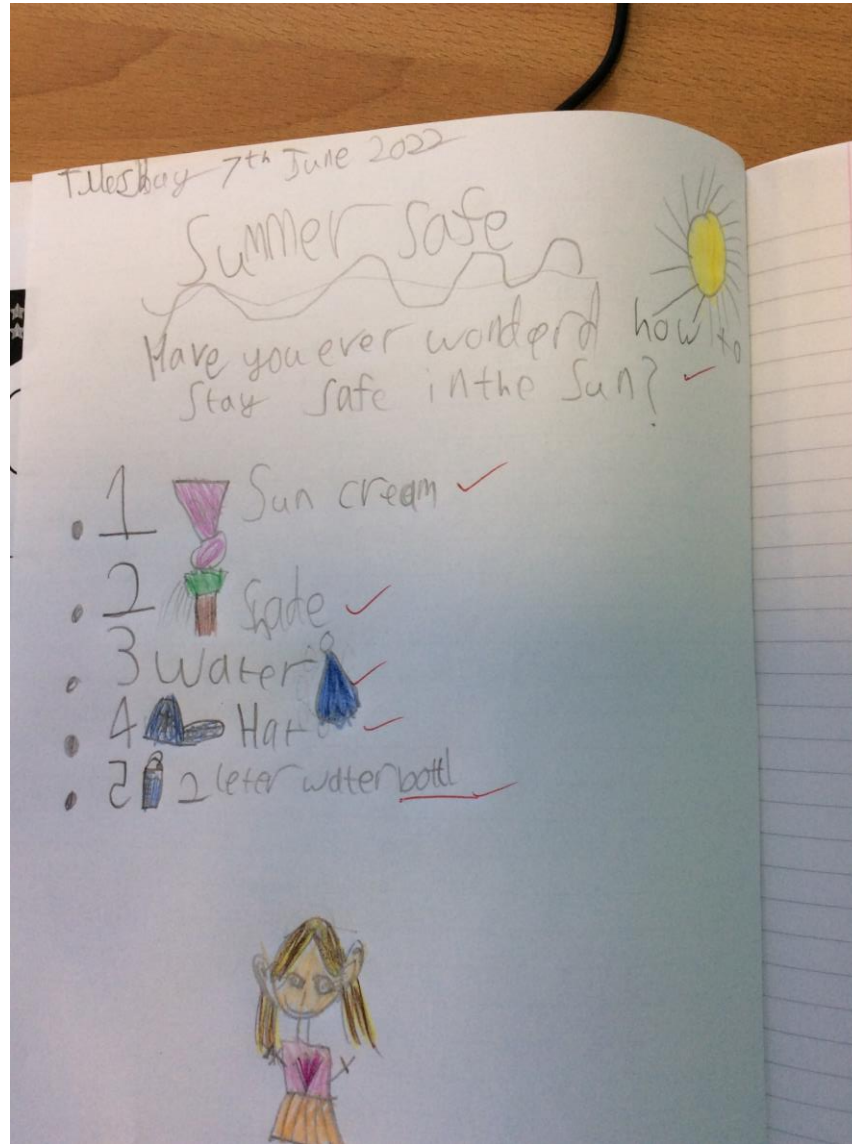

If you go to the beach you have to be careful as it is busy and the water can be dangerous.

You should wear sun cream when you are in the sun and put a hat on to protect your nose and eyes.

Sun Safety Poster

What we already know:

- Autumn topic we looked at seasonal changes: Autumn/Winter, hours of daylight and temperature etc.
- EYFS talk about how to keep ourselves healthy by wearing sun cream and hats in the sun and go on seasonal hunts for things like acorns, coloured leaves etc.

**Our Endpoint**

A poster explaining how to stay safe in the Summer sun.

Forever Facts

I know what the four seasons are and what weather is usually associated with each one of them.

I know why we need to stay safe in the sun and the risks it can have on my health eg, burning.

In the spring the clocks go forwards 1 hour for so the days are longer.

Skills

I can give simple reasons and explanations for what I have seen.

I can make sketches of my observation.

Culture Capital

- Knowing how to keep ourselves safe in Summer.
- Understanding the world around us and what is deemed 'normal' for particular seasons.

Exciting books**SKIN SENSE**

A Story about Sun Safety for Young Children

Lori Lehrer-Glickman, Ed.M., M.Ed.
Illustrated by Gaudie Glickman

**Subject Specific Vocabulary**

Weather	The day to day conditions of the atmosphere: raining, windy, sunny, cloudy etc.
Temperature	The degree of hotness or coldness that can be measured using a thermometer.
Changes	The act, process or result of becoming different.
Seasonal changes	The changes that happen such as the weather, the temperature, the amount of rainfall and hours of daylight based on what season we are in.
Seasons	The year is split into four seasons: Spring, Summer, Autumn and Winter.
